

FIG. 1

A hand-drawn schematic diagram of a mechanical assembly, likely a pump or motor, showing a central shaft with various components. The diagram is labeled with numbers 11 through 36. A central horizontal shaft is shown with a motor or actuator at the left end (labeled 11) and a pump or valve at the right end (labeled 20). The shaft is supported by bearings (14, 16, 24, 36) and has various components attached, including a piston or plunger (12), a valve (18), and a pump head (26). Dashed lines indicate internal components or flow paths. Arrows indicate the direction of rotation or flow.
